At SD Concept Engineering, Inc, we take pride in our untraditional ways of turning concepts into reality and finding distinctive ways to be better. As the demands for reliable horsepower continue to grow, so do our ways of giving you the results you are after. Our mission is to do our part carrying on this industry we love so much by injecting our own dose of "know-how" to the "old school" theories to create **Untraditional Power in Untraditional Ways**. We have a slightly different approach that we would like to share with you. We are focused on each of your specific wants and needs assisting you in the entire process of building your street or performance vehicle. Being different motivates everything we do. From simple to radical, our approach will get you the performance you are after while maintaining your originality.

Innovation

Improving performance is our ultimate goal. When something doesn't work, we fix it. When there's a need for a performance part, we make it. Back in 1995, we introduced our Chrysler supercharger systems using the ATI Procharger head units. The many satisfied customers using our systems will attest to the quality, reliability, and drivability of our products. When the LS1 crowd had difficulties keeping belts on and avoiding belt slip, we came up with a solution—they now have a fool-proof tensioner system that will increase their performance, save them money and time, and they will no longer have to deal with the aggravation of their car being down. We have **MANY** other custom products and services available that will make your car perform better.

No Bull

Honesty is our best policy. We will not tell you what you want to hear just to get your business. We will tell you what you need to hear to realistically achieve your performance goals.

In Stock and Affordable

We are factory direct with too many vendors to list here! We can offer you the aftermarket parts you need at exceptional prices. If we do not have it in stock, we can easily and quickly get it.

Unrivalled Service

Along with all the parts you'll need, plenty of top notch services are available at our facility. With an engine dyno, a chassis dyno, flow benches, a machining center, welding equipment and much more, our experienced staff can tackle any customization or installation of any part in our clean and practical service centers.

PERFORMANCE PARTS

SDCE Fuel Tool (TM)

- Works with carburetors AND EFI
- Gives you complete control of your fuel curve
- Precisely delivers fuel to your engine
- Supplies 0-200HP worth of fuel at any MAP/RPM cell
- Simple to use
- Stand-alone fuel controller programmed with your laptop

Order #: FUEL TOOL PRICE: \$495.00+

MOPAR

SDCE Carb Hat

- No hood clearance issues
- Outflows the competition
- Requires fewer carb mods

Order #: SD Carb Hat PRICE: \$255.00

Mopar HEI Street/Strip Distributor

Fits small block Chrysler applications

- *Easy 1 wire hookup
- *Adjustable vacuum advance
- *50,000 volt spark through 7500RPM
- *Premium cap with brass terminals
- * high power coil

Order #: SD DIST PRICE: \$210.00

To Order Call: 1.401.826.4400

PERFORMANCE PARTS

Chrysler One-wire alternator
Direct Fit for Small Block & Big Block
150 amp, internal regulator
"One Wire" Hook Up

Order #: SDALT PRICE: \$195.00

650HP Blower Carb
These carbs are custom calibrated based on your specs. The 650HP carb is blower ready for up to 650 HP.

Order #: SD 650C PRICE: \$650.00

SDCE Custom Engine Packages
Engine packages are available from 400HP to 1500HP. Carb'd or EFI, naturally aspirated or boosted. Built to your specific needs.

Order #: SD Engines PRICE: \$5000.00 + up

Radiator with /Fan Shroud & Fans
Complete radiator package for your E Body Chrysler includes all aluminum radiator, dual fan shroud and dual Spal fans. Good for up to 1000hp.

Order #: SD RAD PKG PRICE: \$725.00

To Order Call: 1.401.826.4400

MOPAR

SUPERCHARGER SYSTEMS

MOPAR

Since pioneering the Mopar Supercharger system back in 1996, our systems have grown to include new bracket designs and components to accommodate from 300 horsepower to 1500 horsepower—all on 8 or 12 rib drive. No cog drive or crazy gear drive systems needed. Our small block Chrysler supercharger systems will fit any 8 cylinder carbureted or fuel injected Chrysler application.

Kit features

Passenger side blower mount eliminates driver's side clutter
 Our kits come standard with custom bracketry and crank pulley specific for your Chrysler to assure a perfect fit
ZERO BELT ISSUES! Simply put, our spring tensioner system drastically reduces belt replacement when using our tensioner system. Support braces are included with our system to eliminate any bracket flex.

Applications

- A Body 1963 -1976
- B Body 1962 -1974
- C Body 1965 -1975

SUPERCHARGER SYSTEMS

Available Systems

- System 1 (400-450HP)
- System 2 (450-580HP)
- System 3 (580-650HP)
- System 4 (650-800HP)
- System 5 (800-1000HP)
- System 6 (1000+ HP)

All Systems include:

- Head Unit with blower pulley
- 8 rib belt
- Custom bracketry & 8 rib crank pulley
- Intercooler & universal 3" tubing kit (system 2 & up only)
- SDCE 8 rib spring tensioner
- SDCE carb hat
- ProFlo surge valve
- Alternator relocation bracket
- Air filter
- Installation hardware
- 4 bottles of blower oil (self contained head units only)
